OroEnergy LLC is an American energy and industrial supply company headquartered in Maryland, USA. Operating at the intersection of energy supply, industrial procurement, and US federal contracting, we deliver customised solutions to clients facing complex, high-stakes sourcing challenges across domestic and international markets.

Founded on the principle that supply chain complexity should never impede business growth, OroEnergy functions as a lean, highly agile procurement and business development partner — combining deep market intelligence with a growing network of verified suppliers, distributors, and end-buyers.

OUR MANDATE

To serve as a trusted procurement and facilitation partner for energy and industrial buyers and sellers requiring speed, reliability, and technical competence — whether navigating US federal procurement or capitalising on the historic **2026 US-India Bilateral Trade Agreement** to export American industrial equipment into India at zero or reduced tariffs.

OroEnergy operates three distinct, strategically complementary service lines — each addressing a specific segment of the global energy and industrial supply market.

1 Lithium Battery Distribution & Design

ENERGY STORAGE

OroEnergy sources, distributes, and facilitates the design of lithium battery systems for SMEs with specialised or non-standard power requirements — including stationary storage, mobile applications, and custom-configured battery packs. Federal applications include defense-adjacent and civilian agency power systems where off-the-shelf solutions are inadequate.

CUSTOM PACK DESIGN

LIFEPO4 & LI-ION

STATIONARY STORAGE

FEDERAL SUPPLY

2 Refined Petroleum Products Facilitation

COMMODITIES

OroEnergy facilitates the sale of refined petroleum products — diesel, Jet A-1, naphtha, LPG, and crude oil — connecting independent buyers in emerging markets with verified international suppliers. All transactions are structured under formal commercial frameworks with SIAC arbitration provisions and Maryland governing law.

DIESEL / D2 / D6

LPG BULK

NAPHTHA

CRUDE OIL

ICPO / LOI

3 Industrial Engineering Product Resale

MRO / INDIA FOCUS

OroEnergy sources and resells engineering and MRO products for large industrial facilities in overseas markets — with strategic focus on India under the 2026 US–India trade framework. Products include US-origin valves, gauges, fittings, hose systems, instrumentation, and safety equipment from verified OEM manufacturers including RegO, WIKA, ELAFLEX, Garlock, Emerson, and Sherwood.

DLA Energy

PRIMARY TARGET AGENCY

APEX Enrolled

MARYLAND ACCELERATOR

**DLA Energy**

Bulk fuel, packaged petroleum, and energy supply through DLA contracting vehicles — aligned with OroEnergy's petroleum facilitation expertise.

**DLA Land & Maritime**

NSN-coded valves (FSC 4820), gauges (6685), fittings (4730), and hose assemblies (4720) — all aligned with our verified US manufacturer network.

**Prime Contractor Portals**

Registered on Amentum and comparable large prime contractor portals for sub-contracting and supply chain partnerships.

**Battery & Power Systems**

Custom-spec lithium battery systems for federal civilian and defense-adjacent programmes — critical backup and portable power applications.

**APEX Accelerator**

Active engagement for federal bid preparation, compliance support, and contracting development as an emerging small business vendor.

**FSC Supply Categories**

Valves (4820), Gauges (6685), Fittings (4730), Hose Assemblies (4720) — fully aligned with existing supplier relationships.

US–India Bilateral Trade Framework

A historic agreement signed February 2026 eliminates Indian tariffs on ALL US industrial goods — opening an unprecedented export corridor for American equipment into India's \$4 trillion economy.

PREVIOUS TARIFF BURDEN

37–50%

Average on US industrial goods into India

POST-DEAL

INDIA'S COMMITMENT

ELIMINATED

Tariffs on ALL US industrial goods

Historic Milestone

On Feb 13, 2026, the US and India announced an Interim Bilateral Trade Agreement (BTA). India committed to eliminating or reducing tariffs on ALL US industrial goods — the broadest such commitment India has ever made to any trade partner.

\$500 Billion Target

India committed to purchasing over \$500 billion of US energy products, technology, aircraft, and industrial goods over five years — creating sustained institutional demand for American-origin supply chains across every industrial category.

Non-Tariff Barriers Resolved

India agreed to address restrictive import licensing, standards recognition delays, and certification barriers for US industrial goods — removing the hidden friction that made US product exports commercially impractical for smaller intermediaries.

India Industrial Valves Market

India's industrial valves market grows from \$4.1B (2025) to \$7.3B by 2032 at 8.6% CAGR — driven by oil & gas, city-gas distribution, petrochemicals, and water infrastructure. OroEnergy's US manufacturer partners serve every one of these categories.

THE OROENERG ADVANTAGE IN THIS WINDOW

US-Origin Suppliers

Direct relationships with RegO, WIKA, Emerson, Garlock, ELAFLEX — exactly the products India is now incentivised to import duty-free.

India Market Network

Established connections with industrial operators, LPG distributors, and engineering procurement buyers in South Asia for fast pipeline conversion.

Compliant Trade Structures

All transactions structured within US EAR, Indian customs requirements, and BTA rules-of-origin documentation for full tariff benefit eligibility.

India represents one of the most compelling industrial procurement markets of the next decade. Backed by the 2026 US–India trade framework, OroEnergy is positioned as a primary conduit for US-origin industrial equipment into this high-growth market.

INDUSTRIAL VALVES MARKET — INDIA

Market Size (2025)	\$4.1 Billion
Projected Size (2032)	\$7.3 Billion
Growth Rate CAGR	8.6% p.a.
Largest Segment	Oil & Gas (35.7%)
Top Product	Ball Valves (25.7%)

DEMAND INTENSITY BY SECTOR — INDIA

Oil & Gas		Very High
LPG / City Gas		High
Water Infra		High
Petrochemicals		High
Power Gen		Medium
Pharma / Food		Growing

"India's industrial procurement currently exceeds \$300 billion annually and is projected to rise to \$2 trillion over five years — creating a generational opportunity for US exporters and specialised intermediaries with verified supplier networks." — India Commerce Secretary, 2026

WHY INDIA, WHY NOW

The 2026 US–India BTA eliminates tariffs on US industrial goods at the exact moment India's industrial procurement scales toward \$2 trillion — a historic, time-sensitive window for US exporters and specialised facilitators like OroEnergy.

OroEnergy connects independent buyers in Africa, South Asia, and Southeast Asia with verified international suppliers of refined petroleum products — through structured commercial frameworks, transparent fee arrangements, and rigorous counterparty verification.

✓ **Refined Products:** Diesel D2/D6, Gasoil, Jet A-1, Aviation Fuel

✓ **LPG:** Bulk, ISO tank, cylinder — all market formats

✓ **Crude Oil:** Selected grades for qualified independent buyers

✓ **Naphtha:** Industrial buyers in emerging markets

✓ **Structured Agreements:** Maryland law, SIAC arbitration, tiered fees

✓ **KYC / LOI Processing:** Full due diligence, ICPO/LOI handling

TARGET BUYER PROFILES — INTERNATIONAL

Independent Refiners

Seeking feedstock and blending stock from verified origins

Fuel Distributors

Smaller markets in Africa and South/SE Asia

Industrial End-Users

Power generation, agri-processing, heavy industry

- 1 **Inquiry & KYC/AML Qualification**
Initial counterparty review, buyer capacity assessment, and product requirement clarification. All parties meet applicable compliance thresholds before proceeding.
- 2 **Product Specification & Supplier Matching**
ICPO/LOI review, formal product specification, and buyer-seller matching from verified international supply sources.
- 3 **Commercial Agreement**
Facilitation agreement executed under Maryland law with SIAC arbitration, tiered fee schedules, and clear delivery and payment terms.
- ✓ **Delivery Coordination & Settlement**
Active logistics, documentation, and customs coordination through to delivery and post-delivery settlement.

INTERNATIONAL TRADE ENQUIRIES

Qualified buyers may submit LOI/ICPO to: trade@oroenerg.com · oroenerg.com/markets

OroEnergy sources and resells MRO products for large industrial facilities in overseas markets — with strategic focus on India under the 2026 US–India trade framework. All products sourced from OEM manufacturers ensuring full authenticity, traceability, and BTA rules-of-origin compliance for maximum duty benefit.

Cylinder Valves

Newson Gale
Static Safety

Rochester
Level Gauges

✓ LPG valves, regulators & cylinder accessories (RegO, Sherwood)

✓ Pressure & temperature instrumentation (WIKA)

✓ Industrial hose assemblies & dry-break couplings (ELAFLEX)

✓ Gaskets, seals & flange isolation kits (Garlock)

✓ Fasteners & structural hardware in bulk quantities

✓ Static grounding & earthing safety (Newson Gale)

✓ LPG carousel filling plant — turnkey components

✓ Structured RFQ-driven multi-line procurement execution

OroEnergy has demonstrated capacity to manage complex multi-line industrial procurement — including structured 78-line RFQs across LPG valves, gauges, fittings, hose systems, instrumentation, and safety equipment — with full manufacturer-by-manufacturer organisation. This proven execution model is directly applicable to Indian industrial procurement at scale under the 2026 BTA framework.

INDIA KEY TARGET SECTORS

Oil & Gas Infrastructure

- Pipeline expansion & MRO
- Refinery upgrade projects
- Upstream equipment supply

LPG Distribution

- City gas distribution networks
- Cylinder filling plants
- Storage terminal equipment

Water & Wastewater

- Jal Jeevan Mission procurement
- AMRUT 2.0 infrastructure
- Large-scale valve demand

Petrochemicals

- Gujarat & Maharashtra clusters
- Smart valve & control systems
- Safety & shutdown equipment

Our procurement methodology is structured, transparent, and built for accountability — whether serving a US federal agency, a prime contractor, or an independent international buyer in Africa or South Asia.

- 1 Inquiry & Counterparty Qualification**
 Initial KYC/AML review, buyer capacity assessment, and product requirement clarification. All parties meet applicable compliance thresholds before proceeding. International transactions follow FATF-aligned due diligence standards.
- 2 Requirements Scoping**
 Formal RFQ or specification document prepared — defining quantities, quality standards, delivery terms, certifications, and commercial parameters. For federal work, aligned to solicitation requirements and FAR provisions.
- 3 Multi-Source Supplier Engagement**
 Verified OEM manufacturers and authorised distributors engaged for firm pricing. Multi-source comparison ensures competitiveness, supply security, and BTA rules-of-origin compliance for US-to-India shipments.
- 4 Commercial Agreement Execution**
 Formal supply or facilitation agreement executed with clear terms on pricing, payment, delivery, liability, rules-of-origin documentation, and dispute resolution (SIAC arbitration or applicable framework).
- ✓ Delivery Oversight & Relationship Management**
 Active coordination through logistics, documentation, customs, and inspection through to delivery. Post-transaction performance tracking supports long-term partnership development and repeat business.

WHY OROENERG

Dual-Channel Capability

One organisation serving both US federal procurement and international commercial markets — reducing your supplier management overhead while maximising relationship leverage across channels.

Verified Manufacturer Access

Direct OEM and authorised distributor relationships — not unnamed brokers — across energy, MRO, and petrochemical categories, with full product traceability documentation.

BTA Trade Fluency

Active exploitation of the 2026 US–India framework for duty-free routing of US industrial goods — maximising cost competitiveness for Indian buyers versus regional and Chinese alternatives.

Compliance-First Culture

All transactions structured within US EAR, Indian customs requirements, and applicable international frameworks. Full rules-of-origin documentation maintained for every cross-border shipment.
